

If you could minimize product overstock and out-of-stock situations, maintain an optimal product assortment, and prevent customer churn, imagine the results for your business!

Working continuously in the background, my advanced analytics reveal opportunities for you to avoid loss and maximize your profits, in real time. You can choose to tweak parameters to customize and compare my recommended strategies.

As a cognitive engine, I am always learning and adapting to your unique business context and decision-making style. When you decide on a strategy, I provide a practical, actionable list of steps for you to achieve it.

Suggest stock allocation changes in Store 342 for top trending colors in week 28.

I recommend increasing stock allocation for Black (8%) and decreasing for Apricot (3.7%) between Week 28 to Week 32 for Store 342.

Insight

Propensity of a new color introduction in the price point range of \$28-\$35 is High.
